

# Difficult Dialogues

Learn how to sensitively and successfully engage families in discussing alcohol use.

The greatest **barrier** to engaging families to voluntarily participate in needed services is the perceived stigma of a disability due to maternal alcohol use during pregnancy.

## What this training will do

- Learn FASD signs and symptoms
- Gain skills to increase your comfort level in discussing:
  - A parent's or client's alcohol use
  - Alcohol use during pregnancy
  - Other tough topics/concerns
- Transfer these skills to other areas in your work life

After this training—you will be able to have **THE** conversation.

## SAVE the DATE

COMING to Macomb County  
**November 12, 2010 at the MISD.**

Come spend the morning with National FASD trainer and parent of the first person in the US diagnosed with Fetal Alcohol Syndrome.

SAMHSA FASD Center for Excellence is bringing **Barbara Wybrecht, RN, BSN**, back to Macomb!

Barb's motivational challenge in 2003 led to the founding of a parent-focused coalition and local, state, and national funding to prevent FASD and support families living with the life-long disability.

NOW—she'll help us break down further barriers.
